BASIC-ABSTRACT.

Uterine appendage inflammations can be treated without the use of pain-relieving, sedative, spasmolytic or desensitising preps. by prescribing a plant-based remedy in addn. to the usual antibacterial therapy. In conjunction with antibiotics and vitamins, the patient takes an infusion comprising extracts from the following plants: Artemisia, knotweed, St. John's wort, yarrow, strawberry, birch, nettle, peppermint, mountain cranberry, elecampane, liquorice, hops, calendula, German camomile and fennel. The infusion is taken in 60ml dosage 3-5 times daily for 10-14 days.

USE - Used in medicine, specifically gynaecology, for treating uterine adnexitis.

ADVANTAGE = Complications are eliminated.

CHOSSEN-DRAWING: Dwg. 9/9
